FULL STACK DEVELOPER

PROFESSIONAL SUMMARY

Final-year Computer Science student specializing in Full Stack Development and Cybersecurity, with hands-on experience designing, developing, and deploying real-world applications using React, Node.js, Express.js, Spring Boot, MongoDB, and cloud technologies. Built 40+ projects and features, including scalable web applications and practical software solutions. Passionate about secure application development, problem-solving, and creating intuitive digital experiences.

TECHNICAL SKILLS

LANGUAGES	: JavaScript, TypeScript, Java, Python
FRONTEND	: React.js, HTML5, CSS3, Tailwind CSS, Vite
BACKEND	: Node.js, Express.js, Spring Boot
DATABASES	: MongoDB, MySQL, Supabase
CORE CONCEPTS	: REST APIs, JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC), State Management, Responsive UI Design
TOOLS	: Git, GitHub, Postman, Figma, Google Colab

EXPERIENCE

AAA Solutions | Founder & CEO | 2026 – Present

- Founded and lead a service-based software company focused on end-to-end project development, custom web platforms, cloud solutions, and digital client solutions.
- Develop and deliver scalable software solutions using modern full-stack technologies and cloud platforms.

BlueLab Technologies | CEO | 2025 – 2026

- Led digital product development, full-stack web platforms, and scalable cloud-based software solutions.
- Managed end-to-end project development and guided the design and implementation of modern software products.

CodeAlpha | Frontend Developer Intern | 2025

- Developed responsive web interfaces using React.js and modern frontend technologies.
- Optimized client-side performance and collaborated with development teams to build user-focused web applications.

PROJECTS

1. CUSTON

Intelligent Keyboard Shortcut & Workflow Automation Platform

- Built a desktop productivity platform for creating custom command palettes, instant macros, keyboard shortcuts, and workflow automations with fast native execution.
- Tech: React.js, TypeScript, Node.js, Tailwind CSS, Tauri, Rust, Keyboard API, REST APIs

2. CHROME ACCOUNT SWITCHER

Native Chrome Profile Switching Utility

- Developed a lightweight desktop utility for instantly switching between multiple Chrome profiles using global keyboard shortcuts while preserving active tabs and sessions.

3. HEAL & PLAY

Gamified Social Impact & Micro-Donation Platform | React.js, TypeScript, Node.js, Tailwind CSS, Micro-Payments, REST APIs, Vite

- Gamified social-impact and micro-donation platform supporting verified pediatric medical treatments through interactive browser mini-games, direct-to-hospital micro-funding, and transparent settlement tracking.
- Integrated GitHub API, Gemini AI, React Flow, and Three.js for repository exploration and code analysis.

4. 3D BIBLE EXPERIENCE

Immersive 3D Bible Reading Platform | Three.js, WebGL, React.js, GLSL Shaders, Framer Motion, Tailwind CSS, Vite

- Immersive 3D Bible reading and scripture exploration platform featuring interactive 3D spatial typography, WebGL lighting, smooth camera animations, focus-mode reading layouts, and fluid chapter navigation.
- Integrated GitHub API, Gemini AI, React Flow, and Three.js for repository exploration and code analysis.

MOBILE APPS

REACT NATIVE

- Specialized in React Native mobile app development, building cross-platform applications including Crickstreet, an online cricket score-tracking app, and Todo, a smart productivity and task-management application.
- TECH: React Native, Expo, TypeScript, Firebase, REST APIs, JavaScript
- APPS: Crickstreet, Todo

EDUCATIONS

Sri Krishna College of Engineering & Technology | B.E. Computer Science Engineering | 2023 – Present

- Specializing in full-stack development, cloud computing, and software engineering.
- Building real-world web applications and software solutions using modern technologies.

Veveaham HR Sec School | Higher Secondary Education | 2019 – 2023

ACHIEVEMENTS

Key Highlights

- Developed and deployed multiple real-world web and mobile applications, demonstrating practical expertise in full-stack development.
- Built and deployed independent software projects, working across frontend, backend, cloud, and database technologies.
- Successfully developed and managed production-ready projects, from initial design and development to deployment and maintenance.
- Gained hands-on experience with modern technologies including React, Node.js, Spring Boot, Firebase, Cloudflare Workers, and AWS.
- Participated in technical projects and hackathon/college activities, applying problem-solving and software development skills to real-world use cases.
